ALLEN LEMUEL D. CLARIDAD BSIT 1-D

Problem 3

```c
#include <stdio.h>

int main() {

    // Celsius to Fahrenheit converter
    float Fahrenheit, Celsius;

    // Asks for the temperature in Celsius
    printf("Celsius: ");
    scanf("%f", &Celsius);

    Fahrenheit = (Celsius * 9/5) + 32;

    printf("The temperature in Fahrenheit is %f\n", Fahrenheit);
    return 0;
}
```

Problem 4

```c
#include <stdio.h>
#include <string.h>

int main() {
    char greetings1[] = "Passed, maaram ka kun hino ;)";
    char greetings2[] = "Failed, asus di ka man maaram, ada la atubangan";
    char rightPerson[] = "Ms.Mila";
    char chosenPerson[50];
    int value;

    printf("Who's the most beautiful person on the room?\n");
    scanf("%s",chosenPerson);

    value = strcmp(chosenPerson, rightPerson);
    if(value == 0) {
        printf("%s\n", greetings1);
    } else {
        printf("%s\n", greetings2);
    }
    return 0;
}
```
